EXPERIENCE

Frontend Developer @Linarit

Linarit PQM is an multidisiplinary R&D Industrial IoT project to monitor electricity power quality throughout the electricity distribution network. I worked with Electrical, Embedded System, Software engineers and academicians. I developed major features for Single-Page Web Application with **React**. Some of the features I worked on:

- Real time data visuulazation developed from IoT device to frontend with gRPC.
- Client side cache implemented to reduce network traffic.
- Data processing scripts optimized.
- Layout redesigned, implemented and bugs fixed.
- Web Application performance tested.

Linarit PQM is in production:

Software Developer @Sentaks Software

Audiohealer is a mobile application that cleans the background noise from audio automatically with AI. I worked with my professor on this project and created the mobile application from scratch with Flutter and deployed to Google Play and App Store.

- In-App Purchase implemented.
- Managing sound files on mobile application.
- App signed and deployed to Google Play and App Store.
- Endpoint added to Flask server.
- Flask web server deployed to Google Cloud App Engine and maintained.

Audiohealer is in production:
