EXPERIENCE

Frontend Developer @Linarit

Linarit PQM is a multidisciplinary R&D Industrial IoT project to monitor electrical power quality throughout the electricity distribution network. I worked with Electrical, Embedded Systems, Software engineers, and academicians and developed major features for Single-Page Web Application with **React**. Some of the features I worked on:

- Real-time data visualization from IoT device to the frontend with gRPC.
- Client side cache implemented to reduce network traffic.
- · Data processing scripts optimized.
- User customization implemented like color palette, time zone, language.
- · Layout redesigned, developed and bugs fixed.
- The web application performance tested with Google Lighthouse and Puppeteer.

Linarit PQM is in production:

- Web Application
- Flyer

Software Developer @Sentaks Software

Audiohealer is a mobile application that cleans the background noise from audio automatically with Al. I worked with my professor on this project and created the mobile application from scratch with Flutter and deployed to Google Play and App Store.

- In-App Purchase implemented.
- Managing sound files on mobile application.
- App signed and deployed to Google Play and App Store.
- Endpoint added to Flask server.
- Flask web server deployed to Google Cloud App Engine and maintained.

Audiohealer is in production:

- Web site
- Google Play
- App Store

PROJECTS

- YouTube Video Focuser is Google Chrome extension that removes the comments and recommendation sections from YouTube videos.
 - Chrome Web Store
 - Source code
- 2. **Webitor** is web based text editor that can be used for basic text editing tasks that is written with VanillaJS.
 - Web App
 - Source code
- 3. Caps Lock Indicator is an Ubuntu desktop app that popups caps lock status whenever it changes.
 - Source code
- OOP Study I have solved all OOP problems that inside my Java textbook.
 - Source code

EDUCATION

Computer Engineering Bachelor Akdeniz University

Expected graduation date 2024.

Antalya, Turkey

SKILLS

- Languages: JavaScript/TypeScript, Java, Python, Dart, HTML, CSS, Bash
- Technologies: React, Django, Tailwind CSS, Express, Flutter
- Tools: Git, Vim, Ubuntu, Tmux, LaTex

CERTIFICATES

- McGraw Hill B2 English Certificate.
- JavaScript Algorithms and Data Structures.
- Responsive Web Design.
- Intro to Machine Learning.
- End to End Data Science Practicum with Knime.
- Python Fundamentals Track.
- Introduction to Shell.
- Introduction to SQL.

STUDENT CLUBS

Al Akdeniz

I prepared Python tutorial called **PyTalks** with my friend it took 2 months, total 8 lesson and approximately 10 hour. You can watch it on **YouTube**.
