## **EXPERIENCE**

- Linarit: I have developed an Industrial IoT dashboard to display power quality throughout the electricity distribution network with React.
- Sentaks Software: Audiohealer is a multiplatform mobile application that cleans the background noise from audio automatically with AI. I worked with my professor Sinan Hanay on this project and created the mobile application from scratch with Flutter.

## **PROJECTS**

#### 1. Shortly

- URL shortener web application like 'Bitly' which written with Django and deployed to AWS.
- Source code
