Antalya, Turkiye · BSc Computer Engineering, Akdeniz University

## Summary

**Full-Stack Software Engineer** with **4 years of software engineering experience**, building end-to-end solutions across **.NET**, **Python**, **React/Angular**. Designed and deployed **5 production microservices** in a 30+ service tourism platform (**.NET 10**, **CQRS**, **Dapr**, **AWS EKS**). Experienced with event-driven architecture, **AWS**, and **Docker/Kubernetes**.

## Experience

**SAN TSG (OctopusPlus)** Nov 2024 – Jul 2026
*Backend Software Engineer · Antalya, Turkiye*

- Built features for **hotel and excursion bookings**, applying hands-on tourism-domain knowledge.
- Engineered and deployed **5 production .NET 10 microservices** end-to-end in a 30+ service tourism platform (excursion, flight, hotel booking) using **Clean/Onion architecture**, **CQRS**, MediatR, **Dapr** pub/sub over **RabbitMQ**, polyglot persistence (**EF Core + PostgreSQL**, **MongoDB**, **Redis**).
- Built a core **MCP server and AI agent platform** for **30+ .NET microservices**, along with a **RAG service** for technical documentation; **mentored 6 interns**, one of whom was hired as a part-time engineer.
- Created an automated Python service to collect employee utilization metrics from Bitbucket, JIRA, and worklogs, which includes email automation and is deployed to AWS ECR.

**P.I. Works** Jun 2023 – Sep 2024
*Full Stack Software Developer · Remote, Istanbul, Turkiye*

- Developed features for an enterprise Angular and C#/.NET geolocation network platform, increasing unit-test coverage and refactoring code smells to improve maintainability.
- Built internal root-cause-analysis tools to track network mitigations, then Dockerized and deployed them through GitLab CI.
- Added YAML support alongside JSON to a custom configuration NuGet package.

**Linarit** Dec 2021 – Sep 2022
*Frontend Developer · Antalya, Turkiye*

- Took full ownership of the React frontend after the frontend developer left the company, delivering frontend features independently for industrial IoT users.
- Migrated frontend styling from Sass to Tailwind CSS; optimized unnecessary React renders and client-side caching to improve dashboard performance.
- Built real-time gRPC data visualizations for industrial IoT telemetry received from a message broker.

## Education

**B.Sc. Computer Engineering** 2019 – 2024
*Akdeniz University, Antalya*

## Technical Skills

**Backend:** C#, .NET, EF Core, Clean Architecture, SOLID, CQRS, MediatR, FluentValidation, Dapr
**Frontend:** React, Next.js, TypeScript, TanStack Query, Redux, Tailwind CSS
**Data and infrastructure:** PostgreSQL, MongoDB, Redis, RabbitMQ, Docker, Kubernetes, AWS EKS/ECR, GitLab CI
**Tools:** Git, Linux, Vim, Claude Code

## Projects

**Tiro**
*tiro.legal*

- Desktop legal case manager with built-in local LLM (RAG) for lawyers. **Python**, **FastAPI**, **Electron**, **React**, **SQLite**, **ChromaDB**. Cross-platform executable via **PyInstaller**.

**FitBrand**
*fitbrand.app*

- White-label PWA for personal trainers: each trainer gets a fully branded app with custom logo, colors, app icon, and domain. AI-powered workout plans, client management, progress tracking, messaging, and a built-in blog. Installs to the home screen as a **PWA** (no App Store). **Next.js**, **React**, **Tamagui**, **Prisma**, **PostgreSQL**. **MCP** tools for AI features.
