Antalya, Turkiye · BSc Computer Engineering, Akdeniz University

Summary

IoT-focused **Backend Software Engineer** with **4 years of software engineering experience**, specializing in **MQTT** device communication, **real-time time-series telemetry**, and embedded-team collaboration. Built battery telemetry APIs and monitoring dashboards for an electric vehicle charging platform. Designed and deployed **5 production microservices** in a 30+ service platform.

Experience

SAN TSG (OctopusPlus) Nov 2024 – Jul 2026
Backend Software Engineer · Antalya, Turkiye

- Built features for **hotel and excursion bookings**, applying hands-on tourism-domain knowledge.
- Engineered and deployed **5 production .NET 10 microservices** end-to-end in a 30+ service tourism platform (excursion, flight, hotel booking) using **Clean/Onion architecture**, **CQRS**, MediatR, **FluentValidation**.
- Implemented **Dapr** sidecars for microservice communication, using **RabbitMQ** pub/sub and polyglot persistence with **EF Core/PostgreSQL**, **MongoDB**, and **Redis** for state management.
- Built a core **MCP server and AI agent platform** for **30+ .NET microservices**, along with a **RAG service** for technical documentation; **mentored 6 interns**, one of whom was hired as a part-time engineer.
- Created an automated Python service to collect employee utilization metrics from Bitbucket, JIRA, and worklogs, which includes email automation and is deployed to AWS ECR.

P.I. Works Jun 2023 – Sep 2024
Full Stack Software Developer · Remote, Istanbul, Turkiye

- Developed features for an enterprise Angular and C#/.NET geolocation network platform, increasing unit-test coverage and refactoring code smells to improve maintainability.
- Built internal root-cause-analysis tools to track network mitigations, then Dockerized and deployed them through GitLab CI.

Linarit Dec 2021 – Sep 2022
Frontend Developer · Antalya, Turkiye

- Collaborated with **embedded engineers** on **MQTT-based device communication** and **real-time time-series telemetry** for the **Linarit PQM Industrial IoT platform**; developed **React/gRPC** live data visualization across a **5-service microservices** architecture and IoT edge devices, with client-side caching and performance optimizations.

Education

B.Sc. Computer Engineering 2019 – 2024
Akdeniz University, Antalya

Technical Skills

IoT and backend: C#, .NET, MQTT, gRPC, real-time telemetry, EF Core, Dapr
Data and infrastructure: PostgreSQL, MongoDB, Redis, RabbitMQ, Docker, Kubernetes, AWS EKS/ECR
Frontend and tools: React, TypeScript, Git, Linux, Vim, Claude Code

Projects

Tiro
tiro.legal

- Desktop legal case manager with built-in local LLM (RAG) for lawyers. **Python**, **FastAPI**, **Electron**, **React**, **SQLite**, **ChromaDB**. Cross-platform executable.

FitBrand
fitbrand.app

- White-label PWA for personal trainers – fully branded apps with custom logo, colors, domain. AI workout plans, client management, messaging, blog. Installs as **PWA** (no App Store). **Next.js**, **Tamagui**, **Prisma**, **PostgreSQL**. **MCP** tools for AI.
