Antalya, Türkiye · BSc Computer Engineering, Akdeniz University

Summary

IoT-focused **Backend Software Engineer** with **4 years of software engineering experience**, specializing in **MQTT** device communication, **real-time time-series telemetry**, and embedded-team collaboration. Built battery telemetry APIs and monitoring dashboards for an electric vehicle charging platform. Designed and deployed **5 production microservices** in a 30+ service platform.

Experience

SAN TSG (OctopusPlus)

Dec 2024 – Jul 2026

Backend Software Engineer · Antalya, Türkiye

- Built features for **hotel and excursion bookings**, applying hands-on tourism-domain knowledge.
- Engineered and deployed **5 production .NET 10 microservices** end-to-end in a 30+ service tourism platform (excursion, flight, hotel booking) using **Clean/Onion architecture**, **CQRS**, MediatR, **FluentValidation**.
- Implemented **Dapr** sidecars for microservice communication, using **RabbitMQ** pub/sub and polyglot persistence with **EF Core/PostgreSQL**, **MongoDB**, and **Redis** for state management.
- Built a core **MCP server and AI agent platform** for 30+ **.NET microservices**, along with a **RAG service** for technical documentation; **mentored 6 interns**, one of whom was hired as a part-time engineer.
- Created an automated Python service to collect employee utilization metrics from Bitbucket, JIRA, and worklogs, which includes email automation and is deployed to AWS ECR.

Mavi ArGe

Oct 2024 – Dec 2024

Backend Software Engineer (Contract) · Antalya, Türkiye

- Developed **.NET REST APIs** for an electric vehicle charging station Fleet Management **IoT** system (**TÜBİTAK** project), including a rule-based engine for battery telemetry and monitoring dashboards.

P.I. Works

Jun 2023 – Sep 2024

Full Stack Software Developer · Remote, Istanbul, Türkiye

- As a Full-Stack Software Developer at PI Works I have developed new features, increased unit test coverage, and refactoring code smells for an **Angular-.NET** enterprise telco project.

Linarit

Feb 2022 – Sep 2022

Frontend Developer · Antalya, Türkiye

- Collaborated with **embedded engineers** on **MQTT-based device communication** and **real-time time-series telemetry** for the **Linarit PQM Industrial IoT platform**; developed **React/gRPC** live data visualization across a **5-service microservices** architecture and IoT edge devices, with client-side caching and performance optimizations.

AudioHealer

Sep 2021 – Feb 2022

Founder Software Developer · Antalya, Türkiye

- Built AudioHealer, a full-stack AI-powered audio enhancement platform using **DTLN** (TensorFlow/Keras) for real-time noise suppression and an **FFmpeg** 18-band EQ and EBU R128 loudness normalization pipeline. Applied to Y Combinator.

Education

B.Sc. Computer Engineering

2019 – 2024

Akdeniz University, Antalya

Projects

Tiro

tiro.legal

- Desktop legal case manager with built-in local LLM (RAG) for lawyers. **Python**, **FastAPI**, **Electron**, **React**, **SQLite**, **ChromaDB**. Cross-platform executable.

FitBrand

fitbrand.app

- White-label PWA for personal trainers – fully branded apps with custom logo, colors, domain. AI workout plans, client management, messaging, blog. Installs as **PWA** (no App Store). **Next.js**, **Tamagui**, **Prisma**, **PostgreSQL**. **MCP** tools for AI.
