PROFILE

Full-Stack Software Engineer building end-to-end products in .NET, Python, React/Angular. Experienced with event-driven microservices, AWS, and Docker/Kubernetes.

EXPERIENCE

Full Stack Software Engineer

SAN TSG

 Dec 2024 – Present |  Antalya, Türkiye

- Engineered and deployed 5 production .NET 10 microservices end-to-end (API, schema, tests, observability, deploy) in a 30+ service tourism platform (excursion, flight, hotel booking) using Clean/Onion architecture, CQRS (MediatR), Dapr pub/sub over RabbitMQ, polyglot persistence (EF Core + PostgreSQL, MongoDB, Redis).
- Enabled scalable deployments with Docker and Kubernetes on AWS EKS via GitOps (ArgoCD); observability via OpenTelemetry + Grafana/Loki/Tempo, behind Kong Gateway.
- Engineered and led the core MCP (Model Context Protocol) server for 30+ .NET microservices, exposing intent-shaped tools that reuse existing contracts and JWT auth, and architected an LLM-independent AI Agent Service (Python LangChain + LangSmith) with runtime tool discovery, demonstrating end-to-end full-stack ownership.
- Developed a Python/Flask RAG (Retrieval-Augmented Generation) service applying advanced NLP techniques over technical documentation and APIs to deliver precise, source-grounded answers (ChromaDB; docs-ai.santsg.com). Mentored 2 interns and hired a CS student to a part-time engineer role.
- Created an automated Python service to collect employee utilization metrics from Bitbucket, JIRA, and worklogs, which includes email automation and is deployed to AWS ECR.

Full Stack Software Engineer (Contract)

Mavi ArGe

 Oct 2024 – Dec 2024 |  Antalya, Türkiye

- Built a full-stack EV charging Fleet Management IoT system (TÜBİTAK project): .NET REST APIs, a rule-based engine processing battery telemetry, and monitoring dashboards with real-time owner notifications.

Full Stack Software Developer

P.I. Works

 Jun 2023 – Sep 2024 |  Remote, Istanbul, Türkiye

- Developed new features, increased unit test coverage, and refactored code smells for an Angular-.NET enterprise telco platform serving thousands of network devices.

Full Stack Developer

Linarit

 Feb 2022 – Sep 2022 |  Antalya, Türkiye

- Developed key features for the React-based Linarit PQM Industrial IoT platform, including real-time gRPC data visualization across a 5-service microservices architecture and IoT edge devices, with client-side caching and performance optimizations.

Founder Software Developer

AudioHealer

 Sep 2021 – Feb 2022 |  Antalya, Türkiye

- Built AudioHealer, a full-stack AI-powered audio enhancement platform: DTLN (TensorFlow/Keras) neural network for real-time noise suppression, FFmpeg 18-band EQ and EBU R128 loudness normalization pipeline, Flask backend on Google Cloud Run, Svelte web frontend, and Flutter mobile client. Applied to Y Combinator.

SKILLS

Languages	Python, C#, JavaScript/TypeScript
Frontend	React, Angular, Next.js, Tailwind
Backend	.NET, Flask, Node.js, gRPC
AI / LLM	LangChain, LangGraph, llama-cpp, ChromaDB, FastAPI
Cloud & DevOps	AWS (ECR, ECS, Lambda, S3), Docker, Kubernetes, CI/CD
Data	RabbitMQ, Redis, PostgreSQL, MongoDB
Architecture	REST APIs, Event-Driven Microservices, Dapr, Clean Architecture, Multi-Tenant
Tools	Git, Linux, Vim, Tmux, Claude Code, VS Code

PROJECTS

Nand2Tetris — github.com/arinmis/nand2tetris

HDL, Python, Assembly — Built a full computer system from boolean gates to a high-level language (Jack).

Tiro — tiro.legal

Python, FastAPI, Electron, React, SQLite, ChromaDB — Desktop legal case manager with built-in local LLM (RAG) for lawyers. Cross-platform executable via PyInstaller. Built with a part-time collaborator.

o-pt-pt — o-pt-pt.com

Next.js, React, Tamagui, Prisma, PostgreSQL — Multi-tenant SaaS for personal trainers to manage customers, workout plans, exercises, and progress tracking. Cross-platform UI (web + native) via Tamagui.

EDUCATION

B.Sc. Computer Engineering, Akdeniz University, Antalya

2019 – 2024
