Antalya, Turkiye • BSc Computer Engineering, Akdeniz University

Summary

AI Engineer with an **E2E product ownership mindset**, building production LLM systems with **Python, LangChain, LangSmith, RAG, and MCP**. Strong foundation in **.NET** microservices, built **5 production microservices** in a 30+ service tourism platform (**.NET 10, CQRS, Dapr, AWS EKS**). Shipping agentic systems over enterprise documentation.

Experience

SAN TSG (OctopusPlus)

Dec 2024 – Present

AI Engineer · Antalya, Turkiye

- Engineered and led the **core MCP (Model Context Protocol) server** for **30+ .NET microservices**, exposing intent-shaped tools that reuse existing contracts and **JWT auth**, and architected an **LLM-independent AI Agent Service (Python LangChain + LangSmith)** with runtime tool discovery, demonstrating end-to-end full-stack ownership.
- Developed a **Python/Flask RAG (Retrieval-Augmented Generation) service** applying advanced NLP techniques over technical documentation and APIs to deliver precise, source-grounded answers (**ChromaDB**; live at **docs-ai.santsg.com**). Mentored 2 interns and brought on a CS student as a part-time engineer on the team.
- Created an automated **Python** service to collect employee utilization metrics from **Bitbucket, JIRA**, and worklogs, which includes email automation and is deployed to **AWS ECR**.
- Built and deployed **5 production .NET 10 microservices** end-to-end in a 30+ service tourism platform (excursion, flight, hotel booking) using **Clean/Onion architecture, CQRS (MediatR)**, and the **Dapr** sidecar (pub/sub over **RabbitMQ**) on **AWS EKS** (GitOps via **ArgoCD**).

Mavi ArGe

Oct 2024 – Dec 2024

Backend Software Engineer (Contract) · Antalya, Turkiye

- Developed **.NET REST APIs** for an Electric Vehicle charging station Fleet Management **IoT** system (**TÜBİTAK** project), including a rule-based engine for battery telemetry and monitoring dashboards.

P.I. Works

Jun 2023 – Sep 2024

Full Stack Software Developer · Remote, Istanbul, Turkiye

- Developed new features, increased unit test coverage, and refactored code smells for an **Angular-.NET** enterprise telco platform.

Linarit

Feb 2022 – Sep 2022

Frontend Developer · Antalya, Turkiye

- Developed key features for the **React-based Linarit PQM Industrial IoT platform**, including real-time **gRPC** data visualization across a **5-service microservices** architecture and IoT edge devices, with client-side caching and performance optimizations.

AudioHealer

Sep 2021 – Feb 2022

Founder Software Developer · Antalya, Turkiye

- Built AudioHealer, a full-stack AI-powered audio enhancement platform: **DTLN** (TensorFlow/Keras) neural network for real-time noise suppression, **FFmpeg** 18-band EQ and EBU R128 loudness normalization pipeline, **Flask** backend on **Google Cloud Run**, **Svelte** web frontend, and **Flutter** mobile client. Applied to Y Combinator.

Education

B.Sc. Computer Engineering

2019 – 2024

Akdeniz University, Antalya

Projects

Tiro

tiro.legal

- Desktop legal case manager with built-in local LLM (RAG) for lawyers. **Python, FastAPI, Electron, React, SQLite, ChromaDB**. Cross-platform executable.

FitBrand

fitbrand.app

- White-label PWA for personal trainers — fully branded apps with custom logo, colors, domain. AI workout plans, client management, messaging, blog. Installs as **PWA** (no App Store). **Next.js, Tamagui, Prisma, PostgreSQL, MCP** tools for AI.
