Antalya, Turkiye · BSc Computer Engineering, Akdeniz University

Summary

AI Engineer with **4 years of software engineering experience**, building cloud-native microservices and production LLM systems. Production experience with **LangChain**, **LangSmith**, **RAG**, and **MCP**, plus hands-on prototyping with **Microsoft Semantic Kernel**. Built **5 production C#/.NET 10 microservices** in a 30+ service tourism platform on **AWS EKS** and shipped agentic systems over enterprise documentation.

Experience

SAN TSG (OctopusPlus) Nov 2024 – Jul 2026
AI Engineer · Antalya, Turkiye

- Built features for **hotel and excursion bookings**, applying hands-on tourism-domain knowledge.
- Built a **JWT-secured MCP server** and **LangChain agent platform** for **30+ .NET microservices**, with runtime tool discovery.
- Developed a **Flask/ChromaDB RAG service** for technical documentation (**docs-ai.santsg.com**); **mentored 6 interns**, one of whom was hired as a part-time engineer.
- Created an automated Python service to collect employee utilization metrics from Bitbucket, JIRA, and worklogs, which includes email automation and is deployed to AWS ECR.
- Built and deployed **5 production C#/.NET 10 microservices** end-to-end in a 30+ tourism platform (excursion, flight, hotel booking) using **Clean/Onion architecture**, **CQRS**, MediatR, and the **Dapr** sidecar (pub/sub over **RabbitMQ**) on **AWS EKS** (GitOps via **ArgoCD**).

P.I. Works Jun 2023 – Sep 2024
Full Stack Software Developer · Remote, Istanbul, Turkiye

- Developed features for an enterprise Angular and C#/.NET geolocation network platform, increasing unit-test coverage and refactoring code smells to improve maintainability.
- Built internal root-cause-analysis tools to track network mitigations, then Dockerized and deployed them through GitLab CI.
- Added YAML support alongside JSON to a custom configuration NuGet package.

Linarit Dec 2021 – Sep 2022
Frontend Developer · Antalya, Turkiye

- Took full ownership of the React frontend after the frontend developer left the company, delivering frontend features independently for industrial IoT users.
- Migrated frontend styling from Sass to Tailwind CSS.
- Optimized unnecessary React renders and client-side caching, improving dashboard performance.
- Built real-time gRPC data visualizations for industrial IoT telemetry received from a message broker.

Education

B.Sc. Computer Engineering 2019 – 2024
Akdeniz University, Antalya

Technical Skills

AI and backend: C#, .NET, LangChain, LangSmith, RAG, MCP, Semantic Kernel, Flask, FastAPI
Data and infrastructure: ChromaDB, PostgreSQL, MongoDB, Redis, RabbitMQ, Docker, AWS EKS/ECR, ArgoCD
Tools: Git, Linux, Vim, Claude Code

Projects

Tiro
tiro.legal

- Desktop legal case manager with built-in local LLM (RAG) for lawyers. **Python**, **FastAPI**, **Electron**, **React**, **SQLite**, **ChromaDB**. Cross-platform executable.

FitBrand
fitbrand.app

- White-label PWA for personal trainers: fully branded apps with custom logo, colors, domain. AI workout plans, client management, messaging, blog. Installs as **PWA** (no App Store). **Next.js**, **Tamagui**, **Prisma**, **PostgreSQL**. **MCP** tools for AI.
