Antalya, Turkiye · BSc Computer Engineering, Akdeniz University

Summary

Backend-focused **Software Engineer** with **4 years of software engineering experience** and an end-to-end product ownership mindset. Designed and deployed **5+ production C#/.NET microservices** in a **30+ service** tourism platform using CQRS, Dapr, and AWS EKS. Experienced with cloud-native architecture and AI integration through **RAG**, **MCP**, and **LangChain**.

Experience

SAN TSG (OctopusPlus) Nov 2024 – Jul 2026
Backend Software Engineer · Antalya, Turkiye

- Built features for **hotel and excursion bookings**, applying hands-on tourism-domain knowledge.
- Engineered and deployed **5+ production C#/.NET microservices** end-to-end in a 30+ service tourism platform covering excursion, flight, and hotel bookings, using **Clean/Onion architecture**, **CQRS**, **MediatR**, and **FluentValidation**.
- Implemented **Dapr** sidecars for microservice communication, using **RabbitMQ** pub/sub and polyglot persistence with **EF Core/PostgreSQL**, **MongoDB**, and **Redis** for state management.
- Built a core **MCP server and AI agent platform** for **30+ .NET microservices**.
- Built a **RAG-based technical documentation site** while **mentoring 6 interns**; one intern was hired as a part-time engineer.
- Created an automated Python service to collect employee utilization metrics from Bitbucket, JIRA, and worklogs, which includes email automation and is deployed to AWS ECR.

P.I. Works Jun 2023 – Sep 2024
Full Stack Software Developer · Remote, Istanbul, Turkiye

- Developed features for an enterprise Angular and C#/.NET geolocation network platform, increasing unit-test coverage and refactoring code smells to improve maintainability.
- Built internal root-cause-analysis tools to track network mitigations, then Dockerized and deployed them through GitLab CI.
- Added YAML support alongside JSON to a custom configuration NuGet package.

Linarit Dec 2021 – Sep 2022
Frontend Developer · Antalya, Turkiye

- Took full ownership of the React frontend after the frontend developer left the company, delivering frontend features independently for industrial IoT users.
- Migrated frontend styling from Sass to Tailwind CSS.
- Optimized unnecessary React renders and client-side caching, improving dashboard performance.
- Built real-time gRPC data visualizations for industrial IoT telemetry received from a message broker.

Education

B.Sc. Computer Engineering 2019 – 2024
Akdeniz University, Antalya

Technical Skills

Backend: C#, .NET, EF Core, Clean Architecture, SOLID, CQRS, MediatR, FluentValidation, Dapr
Data and infrastructure: PostgreSQL, MongoDB, Redis, RabbitMQ, Docker, Kubernetes, AWS EKS/ECR, GitLab CI
Tools: Git, Linux, Vim, Claude Code

Projects

Tiro
tiro.legal

- Desktop legal case manager with built-in local LLM (RAG) for lawyers. **Python**, **FastAPI**, **Electron**, **React**, **SQLite**, **ChromaDB**. Cross-platform executable.

FitBrand
fitbrand.app

- White-label PWA for personal trainers: fully branded apps with custom logo, colors, domain. AI workout plans, client management, messaging, blog. Installs as **PWA** (no App Store). **Next.js**, **Tamagui**, **Prisma**, **PostgreSQL**. **MCP** tools for AI.
